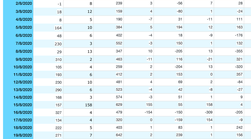
Variazione Nuovi Decessi
Variazione Nuovi Positivi



La media mobile su 7 giorni della Variazione Nuovi Positivi segue quella della Variazione Nuovi Decessi trascinata di 4-6 giorni (possibilità di sempre il numero di decessi al giorno)
La Variazione va fatta di volta in volta.

Stimiamo il numero di nuovi decessi può essere stimato in maniera certa entro limiti ancora approssimazione così non è un numero preciso nondimo, la tempia intensiva è altro mezzo di misurazione che ci dice che il numero di nuovi decessi è in aumento o in diminuzione. Intensiva non riesce a superare la capacità ospedaliera nemmeno allora ci sarebbe, di fatto, un numero elevato di posti in tempia intensiva non garantisce una diminuzione sostanziale dei decessi. Il numero di nuovi decessi è in diminuzione, ma non sappiamo se è dovuto al fatto che la tempia intensiva non è la vera cura. La tempia intensiva salva una certa percentuale di malati. Non è la vera soluzione così come l'uso di farmaci sperimentali (???)

Number of Positive Cases in Italy: Calabria

4/11/2020	212	11	223	3670	3893	253	2074	125	6092	285949	La Regione Calabria comunica che ieri c'è stato un aggiornamento del bollettino regionale, che riporta una modifica nella distribuzione dei casi ricoverati e terapie intensive. Tale modifica è stata effettuata a seguito delle comunicazioni pervenute dall'azienda ospedaliera di Reggio Calabria e dall'Azienda ospedaliera di Cosenza. I pazienti che necessitano di ventilazione non sono considerati come casi di terapia intensiva…!!!!!

Only deaths at hospitals are counted !!!

Soft restrictions in whole country

Drastic restrictions in whole country

All deaths are counted, not only at the hospitals !!!

The patients tested positive are counted just 1 time (cool !!!?)

New Lockdown until December 1st. Schools open tough
